

HOLDING TOOLS

ROD & CASING CLAMP WITH JAWS

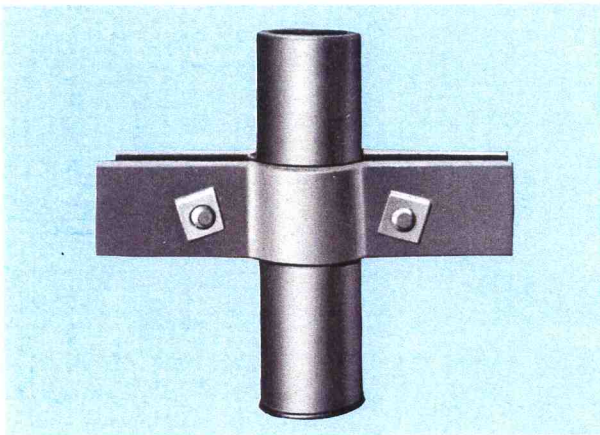

This is to hold the rod & casing. By changing the jaws to include inside the clamp, driller can handle various sizes of tubings. Available models are HDS, HDM and HDL.

Model	HDS	HDM	HDL
Size applicable	30–48 mm	40–73 mm	60–115 mm
Weight of Clamp	25 kg	25 kg	39 kg

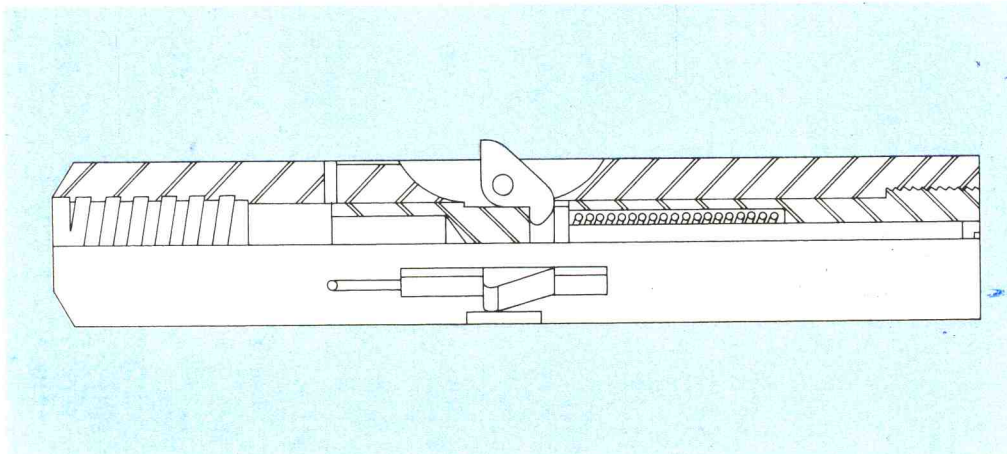

Note: When ordering, please advise what size of rod and casing jaws you require.

CASING CLAMP

This is to hold the casing string in hole at the opening of hole on ground surface.

ROD/CASING CUTTER

Rod/casing cutter is used for cutting rod/casing at any point in a drill hole when the entire string cannot be drawn out. The cutter expands when water pressure is applied.
