

NL-55

Versatile Rotary Spindle Type Drill

Designed to drill to greater depth with larger diameter for civil engineering works, Mineral exploration and water well drilling.

Features

1) Versatility

Adaptable to several purposes:
Large diameter with air hammer and roller bit works, soil investigation, water well and hot spa drilling.

2) Efficiency

Central Control System enables an operator to avoid unnecessary motions and work in safe.

Electric Motor Drive model can be supplied.
